Zyvor Platform

KubeVirt command centers and Kubernetes application gateway

hypercluster v0.1.0 · zyvor.dev · ssahani portfolio

Cloud control layer

Product	GitHub	Emphasis	Port
v9s (Zeus OS)	zeus-os	Visual OS — 48+ TUI views, enterprise auth	:5050
VMRogue (Veyron)	Veyron	GitOps CRDs, templates, Mission Control	:8080
ragnarok	ragnarok	AI VM ops, NL provisioning, cost optimizer	Ingress

Zeus OS

Primary cloud command center — OIDC/LDAP/SAML, cost visibility, live consoles.

Veyron

VeyronVM operator, 44 OS templates, GuestKit pre-flight, PacketWolf context.

Ragnarok

AI healer, NL provisioning, PostgreSQL-backed ops, Velero integration.

All require KubeVirt-enabled cluster (hypercluster k3s path)

Application layer — Hermes

Application Operating Layer — auto-discover apps, stable gateway URLs, Launchpad UX.

:31847	Go	Rust	SQLite
default port	discovery controller	gateway server	app catalog

- Cluster-wide Service scan + EndpointSlice health
- Recognition engine: Grafana, Argo CD, Harbor, Zeus, Forge
- Universal gateway: `/a/{{namespace}}/{{slug}}/*` reverse proxy + WebSocket
- Install after hypercluster — application layer atop Zeus OS
