Zyvor Platform

Export → inspect → convert → deploy pipeline

hypercluster v0.1.0 · zyvor.dev · ssahani portfolio

Migration pipeline

Product	Role	Port
hypersdk	Multi-cloud VM export — 10+ providers	:5080
hyper2kvm	VMCraft engine — offline fixers, h2kweb	:5070
guestkit	Offline disk intelligence — boot scoring	CLI
Aether	16 runtime-pair portability overlay	:8080

Migration capabilities

hypersdk

hypervisord daemon — 238 REST routes, job queue, provider adapters.

hyper2kvm

VMCraft Python engine — 35+ OS versions, Windows VirtIO injection.

guestkit

Pure Rust disk reader — doctor, migrate-plan, fleet analyze.

Aether

Unified YAML spec — Podman, K8s, KubeVirt, Metal3 adapters.

Libvirt → KubeVirt

- hyper2kvm h2kweb: one-click running VM migration to KubeVirt CRs
- GuestKit pre-flight before Veyron deploy
- Aether blue-green migration with rollback

Migration lane pairs with physical and cloud layers
